

"CASCARETS" ACT ON LIVER; BOWELS

No sick headache, biliousness, bad taste or constipation by morning.

Get a 10-cent box. Are you keeping your bowels, liver, and stomach clean, pure and fresh with Cascarets, or merely forcing a passageway every few days with Salts, Cathartic Pills, Castor Oil or Purgative Waters?

Stop having a bowel wash-day. Let Cascarets thoroughly cleanse and regulate the stomach, remove the sour and fermenting food and foul gases, take the excess bile from the liver and carry out of the system all the constipated waste matter and poisons in the bowels.

A Cascaret to-night will make you feel great by morning. They work while you sleep—never gripe, sicken or cause any inconvenience, and cost only 10 cents a box from your store. Millions of men and women take a Cascaret now and then and never have Headache, Biliousness, Coated Tongue, Indigestion, Sour Stomach or Constipation. Adv.

Absinthe-Minded.

"Did you hear how Bill queered himself last night?"

"No, what was it about?"

"Well, he was at his girl's house, and he was talking to her father when it happened. You know Bill is a little absent-minded at times, and that caused the trouble. The old gentleman said to Bill: 'Are you twenty-one yet?'"

"And Bill—"

"The darn fool blurted out: 'Yes; I'll take a little bourbon.'—Michigan Gargoyle.

The Quinine That Does Not Affect The Head Because of its tonic and laxative effect, Laxative Quinine can be taken by anyone without causing nervousness or ringing in the head. There is only one "Brain Quinine." E. W. GROVES' signature is on each box. See.

Marvelous Electric Power.

The tremendous, almost inconceivable possibilities of electric power are strikingly brought out in a giant motor recently built for use in Pennsylvania steel mills. This motor is the biggest in the world. It develops 15,000-horse power. While the motor is of an impressive bulk, it could be easily inclosed in a medium sized room. Some idea of the concentrated efficiency of electric power is realized when one thinks of how many acres would be covered by the 15,000 horses whose work equivalent it can tirelessly produce.

ACTRESS TELLS SECRET.

A well known actress gives the following recipe for gray hair: To half pint of water add 1 oz. Bay Rum, a small box of Barbo Compound, and 1/2 oz. of glycerine. Any druggist can put this up or you can mix it at home at very little cost. Full directions for making and use come in each box of Barbo Compound. It will gradually darken streaked, faded gray hair, and make it soft and glossy. It will not color the scalp, is not sticky or greasy, and does not rub off. Adv.

Privileged Class.

"Seers deal in futures, don't they?" "Yes, especially financiers."—Baltimore American.

Evidently Knew How to Get "Pork." Guide—This is the Parthenon. Tourist—Gee, what a congressman they must have had!—Life.

A torpid liver condition prevents proper food assimilation. Tone up your liver with Wright's Indian Vegetable Pills. They act gently and surely. Adv.

SKIN TORTURES

That Itch, Burn and Scale Quickly Relieved by Cuticura—Trial Free.

It takes about ten minutes to prove that a hot bath with Cuticura Soap followed by gentle applications of Cuticura Ointment will afford relief and point to speedy healing of eczemas, itchings and irritations. They are ideal for all toilet purposes.

Free sample each by mail with Book. Address postcard, Cuticura, Dept. L, Boston. Sold everywhere.—Adv.

Logical Result.

"That girl rings true." "Of course, she does. She's a belle."

An integral part of the modern locomotive—the cast steel side frame—weighs nearly seven tons.

The wall flower at a ball is often the only girl present who can bake bread.

Anuric cures Backache, Lumbago, Rheumatism. Send 10c. Dr. V. M. Pierce, Buffalo, N. Y., for large trial package.—Adv.

It's a fortunate thing for one-half the world that the other half doesn't know how it lives—or why.

It's hard to get turned down, but it is still harder not to be able to turn anything up.

In proportion to its size a fly walks 13 times as fast as a man can run.

Two Automobiles, Fitted Up for Overland Travel, Recently Purchased by a Band of Gypsies.

PUT CAR IN SHAPE

AUTO OWNER SHOULD BE ABLE TO DO THIS HIMSELF.

Time for the Work Is When Machine Is Laid Up on Account of Bad Roads or Weather—Hints That Will Help.

I have read your articles in former issues concerning the overhauling of the car for the coming season, writes Wayne Higgins in the National Stockman and Farmer. In this particular section (where 80 per cent of the farmers own their own cars) there are at least three months during which the car has to be stored on account of the bad roads and inclement weather, and during this time it is a very good idea either to overhaul the car yourself or have it done at a garage. I strongly advocate the former course. The average farmer who owns and operates an automobile can, by carefully reading and studying the instruction books which accompany the car, prepare himself to do all the overhauling necessary on the average car.

Before beginning the overhauling of the car it is a very good idea to provide a liberal quantity of the following: gasoline, motor oil, kerosine, cup grease, transmission greases, cotter pins, assorted nuts and washers and a complete tool kit, all of which can be found at any good supply house at reasonable terms.

Beginning at the front of the car at the wheels they should be removed and both sets of bearings and spindles thoroughly washed with gasoline and wiped dry with waste. If worn they should be adjusted, repacked with a good grade of medium grease and replaced, being sure to get the locknut in position, also the cotter pin, using a new one if necessary. Next the springs should be separated and a thin layer of graphite placed between leaves, to give resiliency and prevent squeaking.

Next we will go to the motor. If the car has not been run over five to ten thousand miles it will not be necessary to take it down. However if the flywheel shows play when grasping it and trying to rock it sideways the cylinder block should be removed and the bearings tightened by removing one or more of the thin shims and retightening the nuts. The crank case and oil reservoir should be drained and thoroughly washed out with kerosene or gasoline. The cylinder head, combustion chamber, etc., should be thoroughly scraped to remove all carbon deposits, the valves ground in till a thorough seal is secured. Put new oil in crank case.

The radiator and water cooling systems should be inspected. If radiator leaks it may be soldered, or if slight leaks occur in the tubes it may be repaired by using boiler compound or some of the many other preparations on the market.

The universal joints, transmission, differential, etc., should be washed out with gasoline and repacked with new grease. The wiring of the car should be thoroughly gone over and repaired if any breaks occur. The brushes on the commutator of the generator and starter motor should be replaced if badly worn. The commutator should be brightened by pressing a piece of emery cloth on it while running. The connecting terminals on the storage battery should be brightened before connecting to the system or it will not operate the starter properly. Do not forget to add distilled water regularly to the battery.

The gasoline tank and line should be inspected to see that there are no leaks. Have the car thoroughly washed and if the paint is good have it given a coat of good varnish. Brighten up the seats and top with a coat of seat and top dressing, let these thoroughly dry and set, and your car will run and look as good as ever.

Cleveland Makes Claim.

According to the 1915 government census, Cleveland leads all other cities in the production of motorcar parts which are assembled in other cities into complete cars. At present over 80 manufacturers of car parts are located in Cleveland, and the Cleveland chamber of commerce, which has been very active of late inducing motor industries to locate in Cleveland, has estimated that from 70 to 75 per cent of the parts used in the middle West manufacturing section are manufactured in the Cleveland district. These include drop forgings, sheet aluminum, sheet steel, frames, bearings, leather, paints, varnishes, etc. To these might be added various accessories, such as batteries, spark plugs and lamps.

*GYPSIES NOW USING AUTOS

Nomads Are Beginning to Discard the Horse, Their Inseparable Companion for Centuries.

Even gypsies are abandoning horses for motors. A band of about forty of these nomads visited Columbus, O., last summer, traveling in three covered automobiles which had been purchased a short time before. The leader of the gypsies said that the cost of the cars was \$3,000, \$1,000, and \$750, respectively. Each motor was fitted up in true gypsy fashion, and portions of the tops were painted in the bright colors characteristic of the familiar gypsy wagons. In all, three families inhabited the three cars. The sage of the group was a woman seventy-five years old; the youngest of the children was three months old.—Popular Mechanics Magazine.

ATTACHED TO SPARK PLUG

Intensifier That Is Said to Be a Distinct Improvement Over Methods in Present Use.

By attaching one of the little spark intensifiers shown in the illustration to the spark plug, the electric current is forced to leap across the space between two screws placed inside a heavy glass cylinder. The spark is thus changed to a static current, which does not seek for a short circuit, but is

forced to the next gap, which is at the point of the spark plug. It is claimed that the use of the little device will fire plugs that have become shortened through accumulation of soot, carbon, or grease, or by broken porcelain. Another advantage claimed is that a hotter explosion is caused, thereby keeping the plugs and cylinders clean and making the motor easier to start.

Electric Bulb in Glove.

When the automobile driver is about to stop or turn a corner in the daytime his extended arm warns the cars behind him of his intention. When he wants to turn or stop at night, his warning arm is likely to be lost in darkness. A new glove has been put on the market, which has a tiny electric bulb fastened to the back, wired to a light battery in the driver's pocket. By closing his fingers in a certain way the driver can close the light circuit and light the bulb on the back of the glove. Thus his extended warning arm carries a clearly visible point of light for night driving.

Germany Uses Steel Tires.

"Steel tires for motorcars are now being used in Germany because of the scarcity of rubber," according to the Iron Age. "They consist of dozens of fine steel threads woven together and fixed over an inner band of rubber. After running about 3,500 miles the steel cover is worn out and has to be replaced. The rubber inner tube remains intact. It is stated that the effect of the steel tires is to retard the speed and make the riding rough."

To Keep Windshields Clear.

There are preparations on the market which, when applied to the outside of the glass, are said to cause the drops of water to run off instead of collecting and obscuring the glass. A mixture of equal parts of glycerin and kerosene is recommended for this purpose, and we advise you to try it. These preparations have to be applied rather frequently in order to be effective.

Automobiles Now Do the Chores.

A novel device called a motor treadmill has just been put on the market by a New England manufacturer, says the Popular Science Monthly. It makes it possible for the power of any automobile to be utilized for running a cordwood saw, threshing machine, cider press, cream separator or butter-making machine.

REBELLION

By SUSAN E. CLAGETT.

"You rail against convention," the man at the wheel said, "but you have not told me what you would offer in its place. There is no need for you to go into the byways and hedges in search of the creature man. I can name four who would deem it a privilege to spend the rest of their lives in your company and I know that you have sent them to the corners of the earth. Raiston is in Japan, Howard and Lawrence are driving ambulances in France, Chapman is with Pershing in Mexico. Why did you do it?"

Sophia Isham looked at her companion with somber eyes. She could not smile, although the note of amusement in his voice would have been contagious if the subject of their talk had not been a vital one to her.

"If I tell you that not one of them has asked me to marry him, would you believe me?"

"Certainly not!" His reply was emphatic.

"So I supposed. Neither will you believe me when I tell you that I have never been asked in marriage, humiliating as is the admission. But it is true, nevertheless. Men find in me a pleasant companion, a good comrade. I am their confidant, but our friendship has never crossed the dividing line between pleasant friendliness and the deeper feeling. That I cannot arouse admiration, love, has cut deep.

"That fact is burned into my consciousness and I resent the attitude of the world toward the woman who would strive for her happiness by seeking it for herself. It is a man-made world, with man-made customs and, perforce, she who finds no favor in his sight must bow to the inevitable and accept the fate thrust upon her. Convention forbids the least little step across the boundary of his dominion, even though she may see happiness beckoning to her from the farthest corner. Why should she be looked upon as a failure if she ventures over that line of demarcation?"

"Well, what are you going to do about it?" he asked with evident amusement as he brought the car to a standstill to allow a heavily loaded wagon to pass on the narrow road. "What would you suggest that will take the place of the old-established order of things? You are so essentially feminine that I cannot imagine you taking the initiative in such matters."

"Why not?" she retorted with passionate warmth. "Because I am passed by must I forever give up the thought of love, of companionship, the feel of a warm little body within my arms? Or, if not passed by, must I take what is offered when, unoffered, there is a better which might be mine if I could but overcome the reluctance, entailed by convention and my womanhood, to ask for it?"

"There is a possibility, you know, that you may meet with a rebuff. Have you thought of that?"

She drew in her breath sharply. "I have a right to happiness," she answered stubbornly. "If it will not come in the accepted way I will fight for it. It will be hard, but I must."

Until now he had not taken her seriously, but there was a strain in her face, in her figure, in her clasped hands that made him feel her earnestness. He had known her for many years, had been a constant visitor in her home and thought he knew her every whim and caprice, but this intensity, underlying her usual cool friendliness, took him unawares. He was frankly uncomfortable.

"You told me there were four," she said presently, breaking the silence that had fallen between them. "They were not lovers, but if they had been my choice would not have been made from among them. They were good dancers, perfect escorts, desirable as comrades, but nothing more."

"How can you say that when you know what they are doing?" he asked gravely. "Do weaklings go to the battlefield?"

"No. But there was a lack hard to explain. What they are doing will develop traits that would have forever lain dormant but for the horrors of this awful war. But when they left they were not the men to whom I would give my heart's blood and think nothing of the giving." She turned to him suddenly. "What is your definition of a man?"

He looked at her thoughtfully. "About the same as yours, I think. Force, integrity, honesty of purpose, gentleness, consideration for others, a carrying out of the right as he sees it no matter at what cost to himself."

She nodded. "That is what I want," she said tensely, "a man, not the pretense of one."

"You have found such a one?"

"Yes." "You have told him that you care?" "Not yet, but I will, I must." The answer came haltingly. "I—I—oh! Don't you know?" She threw out her hands with a little despairing gesture. "I think I will die of shame, but don't you know that it is you?" She ended in a whisper.

For an instant the silence was profound. Then he laughed, a full-throated laugh, in which there was no sting, for he had caught her two hands within his own and raised first one and then the other to his lips.

"You dear!" he murmured under his breath. "God grant I am worthy of your belief, that I will never disappoint you."

CASTORIA

THE CASTORIA COMPANY, NEW YORK CITY.

DR. KILMER'S SWAMP-ROOT PROVES ITS GREAT VALUE IN THE MOST DISTRESSING CASES

Ten years ago I began selling Dr. Kilmer's Swamp-Root and since that time the remedy has steadily gained favor with my customers who have used it. They are always well pleased with the results obtained and I really believe it possesses curative powers for the troubles for which it is so highly recommended.

Very truly yours,
JOHN ROBINS, Druggist,
April 19th, 1916. Broadhead, Ky.

About fifteen years ago I commenced selling Dr. Kilmer's Swamp-Root and since that time I have never had a single complaint. Swamp-Root seems to give universal satisfaction to its users in every case. Very truly yours,
L. OBERDORFER,
April 28th, 1916. Paris, Ky.

Prove What Swamp-Root Will Do For You

Send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample size bottle. It will convince anyone. You will also receive a booklet of valuable information, telling about the kidneys and bladder. When writing, be sure and mention this paper. Regular fifty-cent and one-dollar size bottles for sale at all drug stores.

Shipping Fever

Influenza, Pink Eye, Epizootic, Distemper and all nose and throat diseases cured, and all others, no matter how severe. Kept from having any of these diseases with SPOHN'S DISTEMPER COMPOUND. Three to six doses often cure a case. One 50-cent bottle guaranteed to do so. Best thing for brood mares; acts on the blood. 50c a bottle, \$5 dozen bottles. Druggists and harness shops or manufacturers sell it. SPOHN MEDICAL CO., Chemists, Goshen, Ind., U. S. A.

Word to Girls.

The late Inez Milholland Boissevain, the beautiful suffragist, never wearied of impressing on young girls the duty of being as beautiful as possible, for she knew what an instrument for good beauty, rightly used, can be.

One of Mrs. Boissevain's favorite dicta was: "A girl can't help her looks, but her looks can help her."

GOOD FOR HUNGRY CHILDREN

Children love Skinner's Macaroni and Spaghetti because of its delicious taste. It is good for them and you can give them all they want. It is a great builder of bone and muscle, and does not make them nervous and irritable like meat. The most economical and nutritious food known. Made from the finest Durum wheat. Write Skinner Mfg. Co., Omaha, Neb., for beautiful cook book. It is sent free to mothers.—Adv.

The Proof.

"Does love really blind a man?" "It must, when you see the way girls put powder on their noses."

Frank.

"Do you find me difficult to comprehend?" "No; quite simple."

Dr. Peery's "Dead Shot" is not a "to-zenzee" or "spray," but a real old-fashioned dose of medicine which cleans out Worms or Tapeworm with a single dose. Adv.

Keep Them Busy.

"I'm a man of few words." "Maybe, but you seem to give what few you have plenty of work."

Do you happen to know a father who would want his son to follow in his footsteps?

Uric Acid!

Ever since the discovery of Scheele in 1775 that uric acid was found within the body—most eminent physicians agree that rheumatism is caused by it; also many distressing symptoms as head-ache, pain in back, stomach distress, swollen feet and ankles, gout, etc.

It was Dr. Pierce of the Invalids' Hotel, Buffalo, N. Y., who discovered a new agent—called Anuric, a harmless remedy that if taken before meals will carry off the uric acid from the system and in this way the pains and aches, the creaky joints and all the distressing symptoms of rheumatism and other maladies disappear. You can easily prove this yourself, by obtaining Anuric at almost any drug store, or send Dr. Pierce 10c. for trial package. Try it and be convinced that Anuric is many times more active than lithia and eliminates uric acid as hot water melts sugar.

WOMEN! IT IS MAGIC! LIFT OUT ANY CORN

Apply a few drops then lift corns or calluses off with fingers—no pain.

Just think! You can lift off any corn or callus without pain or soreness. A Cincinnati man discovered this other compound, and named it freezone. Any druggist will sell a tiny bottle of freezone, like here shown, for very little cost. You apply a few drops directly upon a tender corn or callus. Instantly the soreness disappears, then shortly you will find the corn or callus so loose that you can lift it right off. Freezone is wonderful. It dries instantly. It doesn't eat away the corn or callus, but shrivels it up without even irritating the surrounding skin.

Hard, soft or corns between the toes, as well as painful calluses, lift right off. There is no pain before or afterwards. If your druggist hasn't freezone, tell him to order a small bottle for you from his wholesale drug house.—adv.

The Hell Gate bridge, now nearing completion, cost \$30,000,000.

WITHIN THE REACH of every woman—health and strength. They're brought to you by Dr. Pierce's Favorite Prescription. Take this medicine, and there's a safe and certain remedy for all the chronic weaknesses, derangements, and diseases peculiar to the sex. It will build up, strengthen, and invigorate every "run-down" or delicate woman. It regulates and assists all the natural functions. At some period in her life, a woman requires a special tonic and nerve.

If you're a tired or afflicted woman, turn to "Favorite Prescription," you will find it never fails to benefit. Sold in tablet or liquid form. You will escape many ills and clear up the coated tongue, the sallow complexion, the dull headache, the lazy liver, if you will take a pleasant laxative made up of the May-apple, juice of the leaves of aloes, root of jalap, and called "Pleasant Pellets." You can obtain at drug store these vegetable pellets in vials for 25c.—ask for Dr. Pierce's Pleasant Pellets.
